3-marks Questions

Explain the concept of experiential validation?

Experiential validation means verifying things through our own experience instead of blindly believing something. We check whether it is true in our life. It is an important part of value education. For example, if we believe honestly and brings peace we test it in real situations when we experience the results ourselves.

Differentiate between Happiness & Prosperity?

Happiness is a state of inner satisfaction and peace. It is related to mind and self.

Prosperity on the other hand, refers to having enough physical resources. Happiness is continuous, while prosperity depends on external factors.

A person may be prosperous but not happy. Happiness comes from right understanding and good relationships.

3. Explain the importance of relationships in fulfilling human aspiration?
⇒ Relationships play a key role in achieving happiness. Humans are social beings and need connections with others. Good relationships are based on care, trust and respect. They provide emotional support and security. Without strong relationships, even material success feels empty. Relationships help in emotional personal growth and understanding. They create a sense of belonging.

4. Describe the Harmony between self and body?
⇒ The self is the conscious part, while the body is the physical part. Harmony exists when the body is the physical part. Harmony exists when the body executes them. If the body is not properly cared for, it affects the self. Similarly, wrong decisions from the self, harms the body. Proper food, exercise and discipline balances everything. Understanding the relationship is needed.

5. What is meant by mutual happiness in human relationship?

1) Mutual happiness means both individuals in the relationship feels satisfied and respected. It is not one-sided happiness. It is based on values like trust, care and respect. Also understanding. When both people contribute positively, harmony is created.
